Gold versus equities, Treasuries and oil

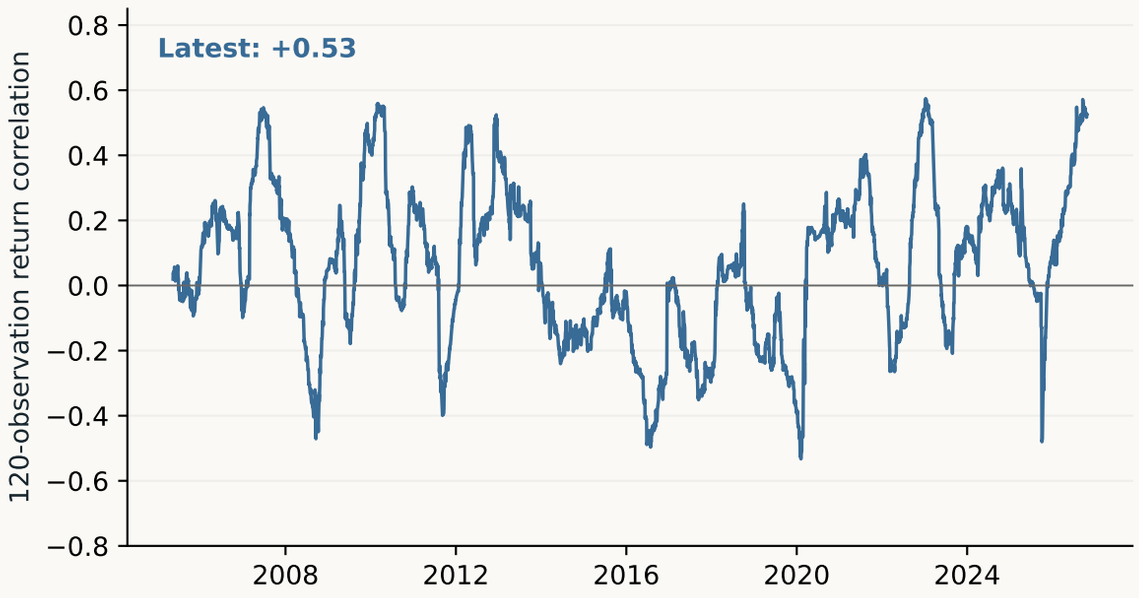

Since gold’s January peak: stocks and oil higher, gold and Treasuries lower

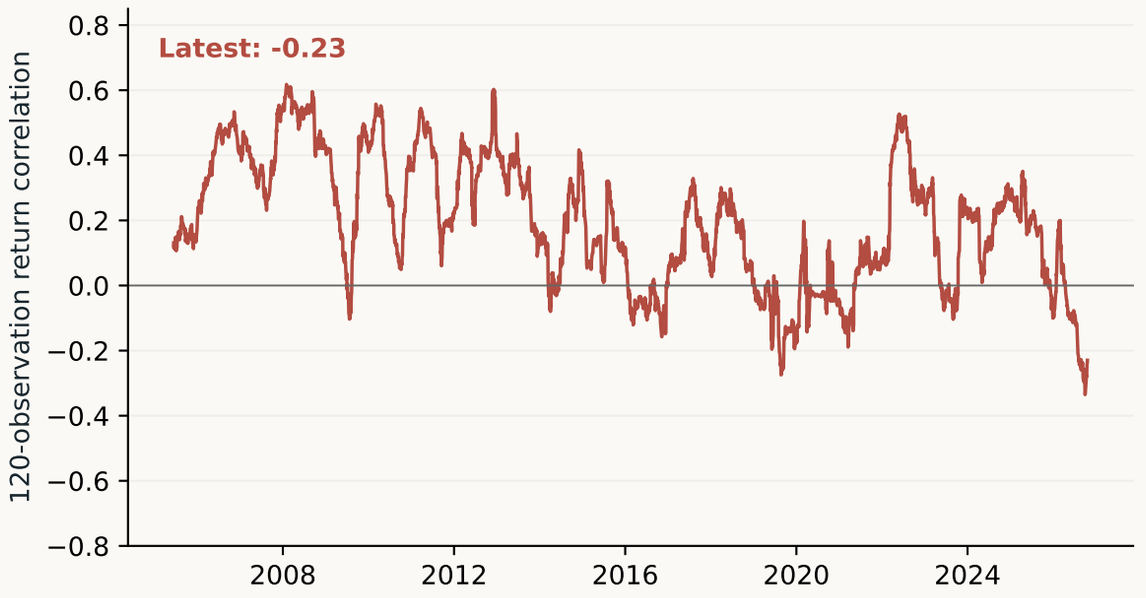

Same dates across assets during each major gold decline

	Gold	US stocks	7–10y Treasuries	20+y Treasuries	WTI spot price
2006 gold decline	-21.8%	-4.4%	+1.2%	+3.2%	-3.8%
2008 gold decline	-29.4%	-32.1%	-0.1%	+2.9%	-47.1%
2011–2015 gold decline	-45.6%	+98.3%	+10.9%	+24.7%	-58.6%
2020–2022 gold decline	-22.0%	+12.6%	-20.7%	-37.3%	+84.0%
2026 · ongoing to Oct 20	-23.8%	+11.7%	-3.1%	-5.4%	+66.6%

Gold has become more correlated with stocks

Gold’s relationship with oil also changes sign

Sources: GLD issuer closes with Oct 23 mirror extension; SPY/IEF/TLT dividend-adjusted Yahoo market-return proxies; EIA WTI spot.
Oil is a price change, not an investable return. Historical gold troughs are retrospective; no recovery or causal forecast is implied.
