Investments	Principal Amount	Value
Short-Term Investments — 47.6%		
Repurchase Agreements (a) — 47.6%		
Repurchase Agreements with various counterparties, rates 3.55% - 3.62%, dated 5/29/2026, due 6/1/2026, total to be received $1,831,880 (Cost $1,831,330)	$ 1,831,330	$ 1,831,330
Total Investments — 47.6% (Cost $1,831,330)		**1,831,330**
Other assets less liabilities — 52.4%		2,012,855
Net Assets — 100.0%		**$ 3,844,185**

(a) The Fund invests in Repurchase Agreements jointly with other funds in the Trust. See "Repurchase Agreements" in the Notes to Financial Statements to view the details of each individual agreement and counterparty as well as a description of the securities subject to repurchase.

As of May 31, 2026, the gross unrealized appreciation (depreciation) of investments based on the aggregate cost of investment securities and derivative instruments, if applicable, for federal income tax purposes was as follows:

Aggregate gross unrealized appreciation	$ 864,226
Aggregate gross unrealized depreciation	(294,063)
Net unrealized appreciation	$ 570,163
Federal income tax cost	$ 1,831,330

Swap Agreements[a]

Ultra MSCI Brazil Capped had the following open non-exchange traded total return swap agreements as of May 31, 2026:

Notional Amount ($)	Termination Date[b]	Counterparty	Rate Paid (Received)[c]	Reference Instrument	Value and Unrealized Appreciation/ (Depreciation)[d] ($)	Financial Instruments for the Benefit of (the Fund)/the Counterparty ($)	Cash Collateral for the Benefit of (the Fund)/the Counterparty ($)	Net Amount[e] ($)

7,689,598					570,163			
				Total Unrealized Appreciation	864,226			
				Total Unrealized Depreciation	(294,063)			

a The Fund's Swap Agreements are not accounted for as hedging instruments under ASC 815.

b Agreements may be terminated at will by either party without penalty. Payment is due at termination/maturity.

c Reflects the floating financing rate, as of May 31, 2026, on the notional amount of the swap agreement paid to the counterparty or received from the counterparty, excluding any commissions. This amount is included as part of the unrealized appreciation/(depreciation).

d The Fund discloses amounts due to the Fund from the counterparty (unrealized appreciation on swap agreements) at period end as an asset on its Statement of Assets and Liabilities. Amounts due to the counterparty from the Fund (unrealized depreciation on swap agreements) are disclosed as a liability on its Statement of Assets and Liabilities. The Fund presents these amounts on a gross basis and does not offset or "net" these amounts on its Statement of Assets and Liabilities.

e Represents the "uncollateralized" amount due from or (to) the counterparty at period end. These amounts could be due to timing differences between the movement of collateral in relation to market movements, or due to agreement provisions allowing minimum "thresholds" that would need to be exceeded prior to the movement of collateral. To the extent that a net amount is due from a counterparty, the Fund would be exposed to the counterparty by such amount and could suffer losses or delays in recovery of that amount in the event of a counterparty default.

f In order to facilitate the daily valuation of these swap transactions as of close of business New York time, one or more financial products traded on a U.S. exchange are used as the reference entity as a surrogate for the respective underlying index for the purposes of both daily valuation calculation as well as final settlement of the swap.

to the counterparty a floating rate of interest on the notional amount of the swap agreement plus the amount, if any, by which the notional amount would have decreased in value had it been invested in such assets plus, in certain circumstances, commissions or trading spreads on the notional amount. Therefore, the return to the Fund on a long swap should be the gain or loss on the notional amount plus dividends or interest on the assets less the interest paid by the Fund on the notional amount. As a trading technique, the Advisor may substitute physical securities with a swap agreement having investment characteristics substantially similar to the underlying securities.

Some Funds may also enter into swap agreements that provide the opposite return of their index or a security. These swaps are similar to the long swaps disclosed above except that the counterparty pays interest to each Fund on the notional amount outstanding and that dividends or interest on the underlying instruments reduce the value of the swap. In addition, in certain instances, each Fund will agree to pay to the counterparty commissions or trading spreads on the notional amount. These amounts are netted with any unrealized gain or loss to determine the value of the swap.

A Fund's current obligations under most swap agreements (total return swaps, equity/index swaps, interest rate swaps) will be accrued daily (offset against any amounts owed to the Fund) and any accrued but unpaid net amounts owed to a swap counterparty will be covered by segregating or earmarking cash and/or securities determined to be liquid, but typically no payments will be made until the settlement date. Interest income related to segregated cash is reflected on the Statements of Operations as "Interest."

A Fund will not enter into non-exchange traded swap agreements (i.e., not cleared by a central counterparty) unless the Advisor believes that the counterparty to the transaction is creditworthy. The counterparty to a non-exchange traded swap agreement will typically be a major global financial institution. A Fund bears the risk of loss of the amount expected to be received under a swap agreement in the event of the default or bankruptcy of a swap agreement counterparty. If such a default occurs, a Fund will have contractual remedies pursuant to the swap agreements, but such remedies may be subject to bankruptcy and insolvency laws that could affect the Fund's rights as a creditor.

In the normal course of business, a Fund enters into International Swaps and Derivatives Association ("ISDA") agreements with certain counterparties for derivative transactions. These agreements contain, among other conditions, events of default and termination events, and various covenants and representations. Certain of the Fund's ISDA agreements contain provisions that require the Fund to maintain a pre-determined level of net assets, and/or provide limits regarding the decline of the Fund's NAV over specific periods of time, which may or may not be exclusive of redemptions. If the Fund were to trigger such provisions and have open derivative positions at that time, counterparties to the ISDA agreements could elect to terminate such ISDA agreements and request immediate payment in an amount equal to the net liability positions, if any, under the relevant ISDA agreement. Pursuant to the terms of its ISDA agreements, the Fund will have already collateralized its liability under such agreements, in some cases only in excess of certain threshold amounts. The Funds seek to mitigate risks by generally requiring that the counterparties for each Fund agree to post collateral for the benefit of the Fund, marked to market daily, in an amount approximately equal to what the counterparty owes the Fund, subject to certain minimum thresholds, although the Funds may not always be successful. To the extent any such collateral is insufficient or there are delays in accessing the collateral, the Funds will be exposed to risks, including possible delays in recovering amounts as a result of bankruptcy proceedings.

The use of swaps is a highly specialized activity which involves investment techniques and risks in addition to, and in some cases different from, those associated with ordinary portfolio securities transactions. The primary risks associated with the use of swap agreements are mispricing or improper valuation, imperfect correlation between movements in the notional amount and the price of the underlying investments, and the inability of counterparties or clearing organizations to perform. A Fund may use a combination of swaps on an underlying index and swaps on an ETF that is designed to track the performance of that index, or it may solely use swaps on an ETF to achieve its desired investment exposure. The performance of an ETF may not track the performance of its underlying index due to embedded costs and other factors. Thus, to the extent a Fund invests in swaps that use an ETF as the reference asset, that Fund may be subject to greater correlation risk and may not achieve as high a degree of correlation with its index as it would if the Fund used only swaps on the underlying index. The Advisor, under supervision from the Board, is responsible for determining and monitoring the liquidity of the Funds' transactions in swap agreements.

All of the outstanding swap agreements held by the Funds on May 31, 2026 contractually terminate within 23 months but may be terminated without penalty by either party daily. Upon termination, the Fund is entitled to receive or pay the "unrealized appreciation or depreciation" amount existing at the date of termination.

The Financial Accounting Standards Board, pursuant to Accounting Standards Codification 815-10 ("ASC 815-10"), requires companies (including the Trust) to disclose information intended to enable financial statement users to understand how derivative instruments affect the Statements of Assets and Liabilities as well as the effect of derivative instruments on the Statements of Operations during the reporting period, in the context of each entity's risk exposure. ASC 815-10 provides examples of risk exposure, including interest rate, foreign exchange, equity and credit.
