# Gold during conflict: the horizon changes the answer

**Same pre-event closing-price baseline · GLD nominal USD returns**

| | Prior 21 sessions | First session | 5 sessions | 21 sessions | 63 sessions | 126 sessions |
|---|---|---|---|---|---|---|
| Georgia 2008 | -5.9% | -1.9% | -7.8% | -8.4% | -15.4% | +4.1% |
| Crimea 2014 | +5.9% | +0.1% | +0.6% | -2.7% | -5.4% | -3.7% |
| Ukraine invasion 2022 | +3.6% | -0.6% | +0.8% | +2.7% | -2.3% | -8.4% |
| Hamas attacks 2023 | -4.7% | +1.8% | +5.4% | +8.0% | +10.7% | +28.3% |
| Iran attack 2024 | +7.8% | +1.9% | +1.9% | -0.3% | +3.2% | +13.2% |
| Israel–Iran war 2025 | +4.3% | +1.3% | -0.7% | -1.8% | +7.4% | +26.0% |
| US/Israel–Iran war 2026 | -2.2% | +1.3% | -2.1% | -14.3% | -13.8% | -15.5% |

**An initial reaction does not determine the following months**

Source: SPDR issuer GLD closes; fixed selected event dates verified at primary chronology sources.
Pre-event column is the run-up ending at the baseline; other columns start at that baseline. Later returns include all concurrent shocks.
Selected examples, not all wars or a causal trading backtest. Approximately 21 / 126 sessions correspond to one / six months.
