

CMBS Delinquency Report:

Overall Rate Decreased One Basis Point

The Trepp CMBS Delinquency Rate decreased by one basis point to 7.54% in April 2026.

The five largest newly delinquent loans accounted for just over \$1.26 billion of the roughly \$2.63 billion in newly delinquent loans, including a Houston office loan, a New York City office loan, a San Francisco multifamily loan, a NYC multifamily loan, and a national warehouse and distribution portfolio.

This month broke from the recent trend of non-performing matured balloon loans dominating the newly delinquent loan list, with 42% of newly delinquent loans this month being non-performing matured balloons, 40% were 30-days delinquent, and the remainder were in foreclosure or real estate owned (REO).

Among all newly delinquent loans, non-performing matured balloon was the most common delinquency classification, consistent with prior months.

At the property-type level, two of the five major property type rates increased while three moved lower. Industrial moved modestly higher by 31 basis points to 0.96% due to one portfolio loan going 30 days delinquent. Multifamily increased 56 basis points to 7.71%, pushing above last month's high-water mark, primarily from the two large multifamily loans mentioned above. Both went 30 days delinquent.

Lodging posted the largest decrease of 79 basis points to 6.52%, reversing the March increase as two large loans changed status to performing, matured balloon from non-performing. Retail had a slight markdown of 31 basis points to 6.31% as two premium outlet loans also became performing, matured balloons. The office rate is largely in line with March, declining two basis points to 11.69%.

If loans past their maturity date but current on interest (classified as performing matured balloon) were included, the delinquency rate would register 9.06%, down one basis point from March. This figure sits 152 basis points above the headline rate of 7.54% and continues to highlight the role of maturities in overall CMBS performance. The seriously delinquent rate (60+ days delinquent, in foreclosure, REO, or non-performing balloons) also decreased, declining to 7.27% (from 7.29%).

The percentage of loan balance in the 30-day delinquent bucket is 0.27%, essentially flat versus March (0.26%).

The figures assume defeased loans are included in the denominator unless otherwise specified.

The CMBS 2.0+ Numbers

- The CMBS 2.0+ delinquency rate remained unchanged – at 7.45% – in April.
- The percentage of CMBS 2.0+ loans that are seriously delinquent is 7.18%, down one basis point from the prior month.
- If defeased loans were taken out of the equation, the overall CMBS 2.0+ delinquency rate would be 7.63%, down two basis points for the month.

CHART 2: THE CMBS 2.0+ DELINQUENCY RATE

Source: Trepp

Property Type Analysis CMBS 2.0+

- The industrial delinquency rate increased 31 basis points to 0.96%.
- The lodging delinquency rate decreased 79 basis points to 6.51%.
- The multifamily delinquency rate increased 56 basis points to 7.74%.
- The office delinquency rate remained unchanged at 11.60%.
- The retail delinquency rate decreased 31 basis points to 6.00%.

WHAT IS THE DIFFERENCE BETWEEN CMBS 1.0 & CMBS 2.0+?

CMBS 1.0 refers to CMBS issued prior to the 2008 financial crisis, characterized by higher loan-to-value ratios and lower debt service coverage ratios. CMBS 2.0+ refers to the second generation of CMBS issued after the financial crisis, incorporating reforms to restore investor confidence. These include enhanced underwriting standards, increased disclosure requirements, improved loan servicing practices, and stronger risk retention rules in compliance with Dodd-Frank regulations.
